NO.4 Which three steps are required for the validation process performed during Instance Document generation?

- A. Confirm the report language used.
- B. Create the Instance document.
- C. Validate the taxonomy.
- D. Generate the instance document.

Answer: B,C,D

Explanation:

Validation is a three step process. First you validate the taxonomy. The next step is the generation of the instance document, which creates an XML file associated with the instance document. XBRL is an XML-based framework and relies on XML syntax to declare semantic meaning such as XLink and XML Schema. The last step is the creation of the instance document, which can be exchanged with other business entities or filed with a regulatory agency.
